

CSS Frameworks Module Assignment 3

1. What does hidden-xs do?

This class will hide the element that it is applied to on extra small devices (<768px)

2. Briefly describe how the Bootstrap grid system works.

The Bootstrap Grid System uses a series of containers, rows and columns to layout and align content. It is a responsive, mobile first, fluid grid system.

3. What does the container-fluid class do?

It creates a full width container spanning the entire width of the viewport

4. What is a Bootstrap Jumbotron?

Bootstrap Jumbotron is a way to showcase marketing messages on a website. It is a flexible component that uses utility classes to space content out within a larger container.

5. What is responsive design?

Responsive Design is about using code to make web pages render well on a variety of devices, window or screen sizes

6. What is the maximum number of columns that can be nested inside a row?

12

7. What style properties are attached to the navbar class?

```
.navbar-default {
  background-color: #f8f8f8;
  border-color: #e7e7e7;
}

@media (min-width: 768px)
.navbar {
  border-radius: 4px;
}

.navbar {
  position: relative;
  min-height: 50px;
  margin-bottom: 20px;
  border: 1px solid transparent;
}
```

8. What is the class for a blue label?

```
<span class="label label-primary">Blue Label</span>  
<span class="label label-info">Light Blue Label</span>
```

9. What is a glyphicon?

Glyphicons are icon fonts provided by Bootstrap
